2023 COLLECTION

GRANDE MASSIMO

Grande Massimo: Harmony in the color combination creates a strong effect on the ambience of the living spaces with the characteristic of the tissues and marbles.

ABOUT US

In 2015, the Granda Massimo brand embarked on a mission to rebuild the ambience of living spaces. It continues its sectoral activities with the vision of presenting its design pleasure to the interest of a wider market in the world by bringing precious stones with strong characteristics together with its distinguished customers.

It creates new inspirations to create impressive visual effects with its high technical standards, long-lasting reliability of use, unique elegance in design, and brings you the magnificent combination of styles and technical features indoors and outdoors with its heat-resistant, scratch-resistant, antibacterial hygienic and valuable stones that do not have any difference in tone between plates.

Italian technology, design vision, creative power that makes a difference, by expanding the value of Grande Massimo porcelains, a one-piece porcelain of 1600mm x 3200mm size and combining with different combinations, with large patterns, offers you the opportunity to create unique and extraordinary compositions.

Ultra Marble, Marble, Onyx, Stone, Oxido, Concrete, Wood collections, which reflect different styles with their color tones and patterns, bring you together with the variety you need to create your own style, while Grande Massimo's stylish selection is able to create great visual effects by going beyond the limits with its powerful combinations born from the harmony of pieces with different patterns.

Our porcelains, which create powerful visual effects sometimes as a part and sometimes as a whole with their usage areas and shapes, continue to exist in the living spaces of a wide range of customers today.

USAGE AREAS

Although the areas of use are listed as kitchen counter, fireplace, floor, exterior, stairs, tv unit and furniture, they can also be used by architects with strong design power to serve different purposes in a wide variety of spaces by pushing the limits of their creativity. For every living space to be reimagined with Grande Massimo elegance, you can get the inspiration you need from the stone's own character.

HEAT RESISTANT (Maximum protection in heat contact)

Grande Massimo porcelains have successfully completed technical tests in this field, which has been prepared to maintain their properties in case of heat contact. You can use it safely in fireplaces and other living areas where contact with the heat is possible, primarily kitchen counters. In addition, it is recommended to place final or heat pads under hot kitchen supplies to minimize heat contact to extend the service life.

MAXIMUM RESISTANCE TO FIRE AND HEAT

ANTIBACTERIAL (Ultra hygiene against all kinds of factors)

In the use of Grande Massimo porcelains in different areas, this stability, which is provided as a result of long-term R&D and technical tests, provides full protection against dirt and stains that may occur in our porcelains due to various external factors. Thanks to its special texture, we value your health as much as you do thanks to its dust and stain-free feature and antibacterial formation.

STAIN RESISTANT

SCRATCH-PROFF (Strong structure against sharp impacts)

Grande Massimo porcelains, which have a strong and durable structure due to their non-porous nature, are resistant to scratching in contact with sharp surfaces. For this reason, they can be used safely in areas where it is possible to interact with sharp materials. It is recommended to use cutting boards on kitchen countertops in order to keep their technical characteristics stable in the long term.

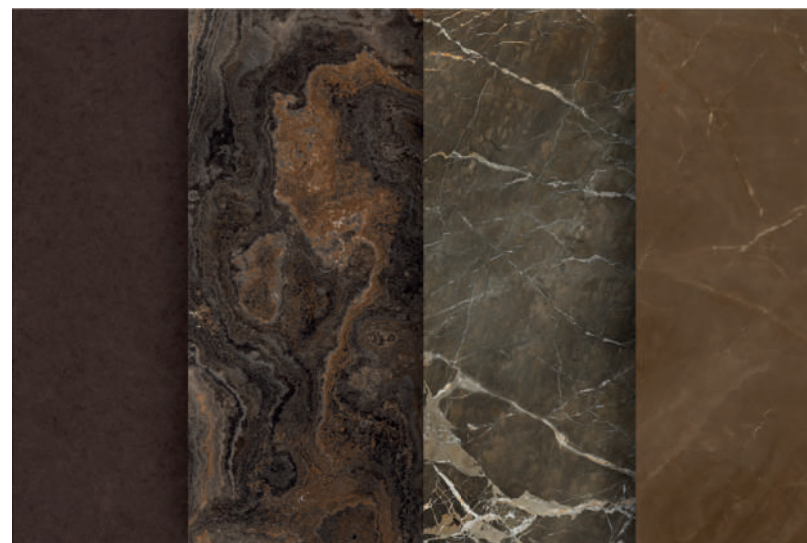

SCRATCH RESISTANT

INFINITY EFFECT (From a valuable part to a more valuable whole)

Continuity is undoubtedly the most valuable property a stone has. While it can protect and extend the life of a stone by avoiding various conditions, it is only possible to create a new whole when it comes side by side with a stone which has durability. The Grande Massimo collections not only offer a continuity advantage, but when they come together on flat surfaces, they create a new whole that is characteristic, stylish and valuable. With Grande Massimo, you can create uninterrupted, original and extraordinary compositions only in your imagination.

Having these high quality values on surfaces and other specially designed products ensures the long-term permanence of the reflection of your style with its holistic elegance and strong durability criteria in its areas of use.

TECHNICAL NOTES

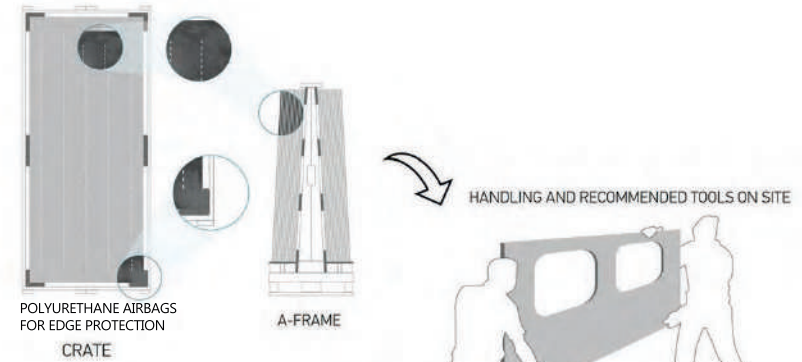

With dimensions of 1600x3200 mm in 6,5 mm and 12 mm thickness, Grande Massimo Porcelain Slabs can be finished both natural matt and glossy and can be installed in monifold applications, such as: kitchen tops, bathroom tops, tables and furnishing, coating of façades, floors, etc.

Properties of Grande Massimo Porcelain Slab: hygienic surface, suitable for all contacts with food - easy to clean and maintain - resistant to frost and high temperatures - resistant to thermal shocks - resistant to fungi and mildew - resistant to stains and acids - UV resistant - resistant to bending - highly resistant to scratches and abrasion.

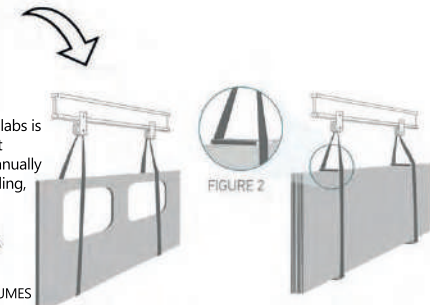

PACKAGING and TRANSPORTATION

Grande Massimo Porcelain slabs can be packed in crate or on A frame
PROTECTIVE WAX LINES BETWEEN EACH SLAB.

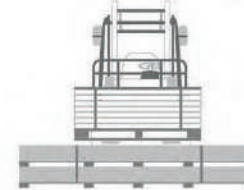

Cases (or stands) must be lifted from the long side by placing 2.5 m long forks under them. Slabs must be vertically handled and in case of bridges the slinging must be made using hemp cloth (steel chains are not recommended) to prevent any breakage and/or chipping. In case of storage on metal stands, the latter should be coated (wood or rubber).

Use of the aluminium kits specially designed for the slabs is recommended for handling. The kits with suckers, limit torsion and permit transport (always vertical) both manually and on forklift. 4 people are required for manual handling, handling vertically from the long side.

TO AVOID BREAKAGE, NEVER STACK DIFFERENT VOLUMES

For **multiple grabs**, the use of a lifting beam is advised with canvas straps spaced out on the base and on the top by a wooden spacer slightly longer than the slab pack (as shown in figure 2). In this way the tension generated during handling is no applied to the slabs, avoiding the breakage of the material.

Warning: always check the maximum load.
